UI/UX Task for Goods Transportation App

Experience Level: 0 to 3 years

Task Overview:

Design a **user-friendly and visually appealing** UI/UX for a **goods transportation app** that supports (Reference site: https://porter.in/)

1. **Two-Wheelers** – For small package deliveries.
2. **Trucks** – For bulk transportation.
3. **Packers & Movers** – For shifting households/offices.

Task Deliverables:

1. **User Flow & Wireframes**
   - Create a user flow diagram showing how users interact with the app.
   - Low-fidelity wireframes for the main screens.
2. **High-Fidelity UI Designs** (Mobile App)
   - **Home Screen** – Service selection (Two-wheelers, Trucks, Packers & Movers)
   - **Booking Screen** – Pickup & drop location, vehicle type, estimated fare.
   - **Order Tracking Screen** – Real-time tracking of the vehicle.
   - **Payment Screen** – Multiple payment options.
   - **History & Support Screens** – Past orders and customer support options.
3. **Prototype**
   - A clickable prototype using **Figma, Adobe XD, or Sketch**.
4. **Design Justification**
   - A short document explaining the design choices (colors, typography, layout).

Bonus (Optional):

- Suggest improvements based on competitor research.
- Add micro-interactions or animations for better user engagement.
